Bipartisan novel

The Double Man, a spy novel by Sen. Gary Hart (D., Colo.) and Sen. William S. Cohen (R., Maine), has hit the bookstores in Denver and will be available nearly everywhere else by the end of April. The book, which has an unusually high first run of 75,000 copies by publisher William Morrow, is about a senator (surprise!) heading an investigation into terrorism and getting into trouble with the CIA and the KGB. Hart, who has published a book on the 1972 presidential campaign, and Cohen, who has published a volume of poetry, said their collaborative effort was born on the back of an envelope in the Senate dining room in the wee hours of a night in 1980.
